# RAKT KUNDALI

The Department of Environmental Science & Technology, SRICT & Department of Chemistry, SRICT- ISR at UPL University of Sustainable Technology jointly organized "RAKT- KUNDALI-2023"- A Blood Donation Camp

(under IQAC) at UPL University of Sustainable Technology in association with Kumarpal Gandhi Blood Bank, Ankleshwar on 1<sup>st</sup> November 2023.

#### SUSTAINABILITY AWARENESS

A Sustainability awareness session was organized by Department of Environmental Science & Technology for students of different schools & colleges. Total 599 students were made aware about various sustainability concepts including Circular Economy, Responsible Consumption, Sustainable energy, Sustainable agriculture, Sustainable Transportation, Green Building, 4R Principle of Waste Management, etc. Students were also explained about Mission LiFE (Lifestyle For Environment), A global mass movement led by India. Students and school management highly appreciated this sustainability drive initiated by UPL University of Sustainable Technology.

### TECHNICAL ARTICLE

Groundbreaking research superconductivity reveals new high-criticalinsiahts into temperature copper-based superconductors. Collaborative efforts uncovered the strange metal behavior of these superconductors and identified a quantum critical point. Extensive X-ray experiments led to this discovery, which holds promise technologies for future and sustainable solutions.

Recent research has unlocked key aspects of high-critical-temperature superconductors, identifying their unique 'strange metal' state and a crucial quantum critical point. This discovery, resulting from collaborative efforts and extensive experiments, paves the way for advanced superconducting technologies.

Taking a significant step forward in superconductivity research, the discovery could pave the way for sustainable technologies and contribute to a more environmentally friendly future.
